

EPC11W

Pump Controller for CH or DHW system

It is designed to control the water pump in the central heating and hot water circulation. It also works as a safety thermostat. It has the ability to turn on and off the pump. The pump will start after exceeding the temperature set by the user „C”, and will turn off after exceeding the set off temperature „U”.

Technical Informations:

Power supply	230V AC 50Hz
Max load of the pump output	3(1) A
Temp. measurement range	0 - 99°C
Adjustable temp. range (ON)	5 - 75°C
Adjustable temp. range (OFF)	10 - 80°C
Sensor temp. range	-10 - 120°C
Sensor cable length	1,5m
Dimension [mm]	155x70x39 mm

Connection description:
